**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election with traverse of Species I in Paper No. 7 is acknowledged. The traversal is on the ground(s) that the claims are directed to a single problem. This is not found persuasive because the species are patentably distinct and moreover, include features requiring diverse searching.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 11-13, and thus also claims 16-18, are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant indicated in Paper No. 7 that all the claims are readable on the elected species, however, Species I fails to include two variable fluid pockets with a throttle opening therebetween as recited in claims 11-13.

3. Claims 14-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant indicated in Paper No. 7 that all the claims are readable on the elected species, however, Species I fails to include a throttle opening, or the damping channel being in the journal bearing. In case claims 14 and/or 15 is/are prosecuted in the future, please take note that there is no antecedent basis for "the core" in line 2 of each claim, respectively.

Art Unit: 3683

***Drawings***

4. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference characters "4" and "9" have both been used to designate the fluid pocket of Figs. 1 and 3. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Claim Objections***

5. Claim 1 is objected to because of the following informalities:  
"can have" should be positively recited as "has". Appropriate correction is required.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-10 and 19-20 is rejected under 35 U.S.C. 102(b) as being anticipated by Brenner et al. (US 5386973).

Brenner et al. disclose a hydraulic including a journal bearing 7 and a supporting bearing 8 which are joined by a spring body 6 made of a rubber elastic material (col. 4 line 9) and border on at least one working space 1a and at least one compensating space 1b, the working space and the compensating space being each filled with a damping fluid (col. 4 line 4) and communicating

Art Unit: 3683

through a damping device 2 in a fluid-conducting manner, wherein, in response to relative displacement of the journal bearing and the supporting bearing with respect to one another, the damping device can have damping fluid flowing through it.

Re claim 2, see partition 10 and channel 2.

Re claims 3-4, see Fig. 4.

Re claims 5-7, see pocket 3a in Fig. 4.

Re claims 8-10, see Fig. 4a.

Re claims 19 and 20, see bellows 12 in Fig. 1, for "essentially without pressure", see the hole in Fig. 1 next to the leader line from "13".

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Satori et al., Oberle, Suzuki et al., Hartel, Pascal et al., Hofmann, Bruhl, Kanda, Makibayashi et al. and Takaoka et al. disclose related devices.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin A Pezzlo whose telephone number is (703) 306-4617. The examiner can normally be reached on M-F 9-5.
